DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 17 and claim 14, line 19, the phrase "enlargement ratios from the size of the source image to the size of the device image" is unclear as to how these two sizes are related by a plurality of more than one ratio.

Allowable Subject Matter

3. Claims 1-15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
4. The following is a statement of reasons for the indication of allowable subject matter:

Re claims 1 & 14 (and dependent claims 2-13 & 15), the art of record does not teach or suggest the generation of

Art Unit: 2625

intermediate data based on source image data and image-size specifying data, the intermediate data being the same as the image data of the source image and also including enlargement ratio data having a plurality of enlargement ratios, followed by the generation of image data in an output memory based on the intermediate data.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tanio et al (each), Yamamoto, Otake, and Shibao disclose examples of processing and expanding page description language image data.
